

MITHRIL RACING EVENT INFORMATION

HOW TO FIND US?

From M25/London: Leave M25 at Junction 10, take A3 past Guildford, take Milford exit, and then A286 via Haslemere and Midhurst to Singleton, and then follow signs to Goodwood Motor Circuit.

From Petworth: Take the A285 towards Chichester, after Halnaker take right signed Motor Circuit.

From Southampton, Portsmouth, Worthing, Brighton and Worthing: Take the A27 towards Chichester. Watch for Goodwood Motor circuit signs on roundabout on A27 Chichester ring road.

Goodwood Motor Circuit and Aerodrome is clearly marked on most road atlases. Once in the vicinity there are plenty of signs for Goodwood from all approaching routes. Please be aware that we are at the Motor Circuit, not the Racecourse (wrong sort of horsepower), and not at Goodwood House! For those using SatNav our postcode is **PO18 0PH**, and the nearest named road is **Claypit Lane**.

There is a map on our website www.mithrilracing.co.uk and your host should have an emailable version of this.

Once you arrive at the Circuit entrance we usually have **signs directing guests to their meeting place**. This is usually upstairs in the Old Control Tower. Turn left just inside gates, and its 200yds ahead. Occasionally we might meet at the Mithril Building. This is straight through the tunnel, and follow road as it bends left. Follow this road past the Aeroclub all the way to the end. You will arrive in our car park, and the Mithril Building has a clocktower on top.

Should you get lost or experience problems, the Mithril office number is 01243 528815, manned during normal office hours.

WHAT TO WEAR?

Firstly, we would suggest a good look at the weather forecast the day before would be a wise move. It is a good idea to bring a coat, and hat whatever the forecast says as the weather can be unpredictable near the coast. Goodwood Motor Circuit is a flat venue with an airfield in the centre, so most parts are quite exposed to the wind.

If your event has an offroad element, then some sturdy footwear is a good idea as the Valdoe site can get quite muddy.

If you are going for a lesson in our Tiger moth biplane, then wrap up warmly! We will lend you a flying jacket etc, but at the 70mph wind goes through rather than round the aircraft, and your head and shoulders are outside!

Secondly, do not wear anything that is smart or valuable, ie Gucci suede jackets etc! Cars, planes and Go Karts are oily things, and so jeans, trainers and casual clothes are best. I would suggest just slightly smarter than you would wear to mow the lawn! Footwear should be flat soled if possible, so no high heels!

The event will continue despite inclement weather, so it's best to be prepared!

Don't forget to bring a camera!
